

Patterns of Aircraft Arriving to London Stansted Airport Towards the North East

- Radar track data between 0 and 3000ft above mean sea level (amsl) - 24 hour week period radar sample
- Radar track data between 3000 and 6000ft (amsl) - 24 hour week period radar sample
- Radar track data above 6000ft (amsl) - 24 hour week period radar sample

All airport operations figures on this map relate to the 24 hour average summer day for the 92-day summer period 16th June to 15th September 2007. The airport operations figures are for fixed-wing aircraft movements and have been derived from data taken from London Stansted's Noise and Track Keeping System (NTK). Figures have been rounded to the nearest whole number. Crown Copyright. All rights reserved. Licence number 100016105
