

## 2022 average summer 24-hour day - aircraft arriving to London Stansted Airport on Runway 22

The radar tracks shown are based on a 3-day sample from the 2022 summer period. The tracks are colour-coded according to the height above mean sea level (AMSL). Statistics on the numbers of operations relate to fixed-wing aircraft movements for the average 24-hour day, calculated over the 92-day summer period from 16 June to 15 September 2022. The figures have been rounded to the nearest whole number. © Crown Copyright and database right 2022.
