Makers**

Are you approaching  
an Aircraft Marshal?

**Hold Short of  
Aircraft Marshals**

## Never Drive Behind an Aircraft Marshal

- When aircraft marshals have engaged marshalling signals with aircraft, never drive behind a marshal.
- Continue to hold short of aircraft marshals until the marshal has lowered their wands or gives you the all clear to proceed.
- Depending on the aircraft type and stand configuration, marshals may need to position themselves in the head of stand road.

CAA CAP 637 and CAP 642  
has further guidance on signal  
requirements to aircraft.
